

QGBA::LogController
::setLevels

```
graph LR; A[QGBA::LogController::setLevels] --> B[QGBA::LogController::levels];
```

A diagram showing a call from the `setLevels` method to the `levels` attribute. The left box is shaded gray and contains the text `QGBA::LogController::setLevels`. A blue arrow points from the right side of this box to the left side of the right box. The right box is white and contains the text `QGBA::LogController::levels`.
