

GBALoadSave

GBASavedataInit

_ashesToAshes

```
graph LR; A[GBALoadSave] --> B[GBASavedataInit]; B --> C[_ashesToAshes];
```

The diagram illustrates a three-step process flow. It begins with a box labeled 'GBALoadSave', which is shaded gray. A blue arrow points from this box to a white box labeled 'GBASavedataInit'. Another blue arrow points from the 'GBASavedataInit' box to a final white box labeled '_ashesToAshes'.
