

src/platform/qt/CoreManager.h

```
graph TD; A[src/platform/qt/CoreManager.h] --> B[QFileInfo]; A --> C[QObject]; A --> D[QString];
```

The diagram illustrates a header file, `src/platform/qt/CoreManager.h`, which serves as a common interface for three classes: `QFileInfo`, `QObject`, and `QString`. Three blue arrows point from the header file box to each of the class boxes below it, indicating that the header file defines or declares these classes.

QFileInfo

QObject

QString
